Contents

Introduction

Local Purinergic Regulation of Blood Pressure 1
G. Burnstock

Vascular Smooth Muscle

Modulation of Dihydropyridine Receptors in Hypertension 15
P. Bellemann and B. Garthoff

Cell Membrane and Regulation of Cytoplasmic Levels of Ca^{2+} in Vascular Muscle 21
C. Y. Kwan, A. K. Grover, and E. E. Daniel

Role of Electrogenic Ion Transport in the Relaxation of Vascular Muscle by Nitrendipine 29
K. Hermsmeyer and N. J. Rusch

Agonist-Induced Contraction of Vascular Smooth Muscle Cells in Relation to Phospholipid Metabolism 35
T. Sasaguri, S. Satoh, T. Ishimatsu, T. Itoh, M. Hirata, and H. Kuriyama

Inhibition of Calmodulin Activity and Vasodilatation 43
J.-C. Stoclet, P. Schaeffer, C. Lugnier, and M.-C. Kilhoffer

Cyclic GMP and Tolerance to Nitrates 49
W. R. Kukovetz, S. Holzmann, and C. Romanin

Changes in Arteries as They Get Smaller 55
J. A. Bevan and R. D. Bevan

Hypoxic Vasodilatation and Hypertension 61
J. H. Lombard, D. R. Harder, and W. J. Stekiel

Vasodilator Peptides

Contracting and Relaxing Action of Neuropeptides on Isolated Human Mesenteric Blood Vessels 65
K. Törnebrandt, A. Nobin, and C. Owman

Thyrotropin-Releasing Hormone and Cerebral Blood Flow 75
L.-O. D. Koskinen

The Cardiovascular Effects and Mechanism of Action of the Calcitonin Gene-Related Peptides 81
I. Marshall and R. K. Craig

Source: https://www.industrydocuments.ucsf.edu/docs/qkmv0000

The Role of Vasoactive Intestinal Polypeptide in the Cortical Vasodilatation Produced by Local Cerebral Activation 89
T. L. Yaksh and V. L. W. Go

Capsaicin as a Probe of the Local Vascular Effects of Sensory Transmitters 97
S. P. Duckles

Neurogenic Vasodilation in Large Cerebral Arteries of the Cat 101
T. J.-F. Lee, M. D. Linnik, Y. Shirasaki, H. Imai, M. P. McIlhany, and J. G. Yu

Vasodilator Axon Reflexes 107
R. A. Westerman, F. W. Magerl, J. Szolcsanyi, H. O. Handwerker, A. Low, A. Pratt, R. Widdop, and W. Kozak

Atrial Natriuretic Factor

Atrial Natriuretic Factor and Production of Cyclic GMP 113
E. H. Ohlstein and B. A. Berkowitz

Species and Regional Vascular Heterogeneity to Atrial Natriuretic Factor 119
R. J. Winquist, E. P. Baskin, E. P. Faison, and A. A. Wallace

Atrial Natriuretic Peptides and Blood Pressure 123
J. G. De Mey

Vascular Effects of Atrial Natriuretic Peptides 129
P. Bolli, F. B. Mueller, A. E. G. Raine, P. Erne, T. J. Resink, L. Linder, and F. R. Buehler

Atrial Natriuretic Peptides in Cardiovascular Disease 137
J. Hedner, T. Hedner, A. Pettersson, A. C. Towle, B. Persson, N. Edvardsson, K. Swedberg, G. Nilsson, and O. K. Andersson

Catecholamines

New Paradigm: A Digital Model of Feedback Regulation of Sympathetic Neurotransmitter Secretion 145
L. Stjärne

Vascular Tone and Diffusion of Norepinephrine 161
I. S. de la Lande, M. G. Venning, and R. G. Morris

Norepinephrine Kinetics in Congestive Heart Failure 167
R. Zelis and D. Davis

Dilatation and Microcirculation Induced by Changes in Sympathetic Activity and Circulating Catecholamines 173
J. M. Marshall

Classification and Subclassification of Peripheral Dopamine Receptors 181
G. M. Drew and A. Hilditch

Dopamine and Noradrenergic Transmission 187
P. Soares-Da-Silva

Source: https://www.industrydocuments.ucsf.edu/docs/qkhv0000

Agonist Regulation of Adrenoceptors 195
C. A. Hamilton, N. M. Deighton, and J. L. Reid

Receptor Reserve and Heterogeneity of Vascular Responses to Vasodilator Stimuli 201
N. A. Flavahan and P. M. Vanhoutte

Excitation-Contraction Coupling Mechanisms in Rat Mesenteric Resistance Vessels Contracted With Norepinephrine 211
H. Nielsen and M. J. Mulvany

α_2-Adrenoceptor Antagonists: A New Approach to Cardiovascular Therapy .. 217
J. P. Hieble, A. C. Sulpizio, R. M. De Marinis, and R. R. Ruffolo, Jr.

Serotonin

Serotonin: Vasodilator Properties and Interaction with Atriopeptin III 223
L. P. Thompson, F. S. Lamb, C. M. King, and R. C. Webb

Mechanisms Underlying the Vasodilatator Effects of Serotonin 229
P. R. Saxena, D. J. Duncker, and P. D. Verdouw

Prejunctional Inhibitory Receptors for Serotonin 235
E. J. Mylecharane, C. A. Phillips, and J. K. Markus

Platelet-Derived Serotonin and the Vascular Wall 243
R. A. Cohen

Responsiveness to Serotonin in Atherosclerotic Blood Vessels 249
D. D. Heistad, M. L. Armstrong, B. Brown, and D. G. Harrison

Possible Involvement of Serotonin in Cerebral Vasospasm 255
M. Hirata and T. Imamoto

Platelet Reactivity in Essential Hypertension 261
P. Guicheney, D. Valtier, M. Baudouin-Legros, and P. Meyer

Interaction Between S_2-Serotonergic and α_1-Adrenergic Receptors and Control of Blood Pressure 267
J. M. Van Nueten, R. Xhonneux, W. J. Janssens, J. A. J. Schuurkes, and P. A. J. Janssen

S_2-Serotonergic Antagonism by Ketanserin in Human Hypertension 273
T. Hedner, K. Winther, A. Pettersson, and B. Persson

Vascular Pharmacology of Naftidrofuryl 281
P. M. Vanhoutte and J. F. Zander

Neurogenic Control

Neurogenic Control of Blood Flow in Human Skeletal Muscles 289
J. T. Shepherd, D. A. Duprez, and L. K. Essandoh

Source: https://www.industrydocuments.ucsf.edu/docs/qkmv0000

Central Nervous Integration of Coronary Reflexes 299
S. W. White, P. G. Moore, G. J. Gazibarich, W. L. Porges, and A. W. Quail

Reflex Control of the Coronary Circulation 307
E. O. Feigl

Neurohumoral Regulation of the Pulmonary Circulation 311
A. L. Hyman, H. L. Lippton, and P. J. Kadowitz

Control of Cutaneous Arteriovenous Anastomoses 321
J. R. S. Hales and G. S. Molyneux

Control of Tongue Circulation 333
K. Pleschka

Muscle Circulation in Exercise: Metabolic Vasodilatation Versus Reflex Vasoconstriction 339
L. B. Rowell

Muscle Afferents and Central Command: Redundant or Differential Control Mechanisms? 345
A. L. Mark, R. G. Victor, and B. G. Wallin

Factors Contributing to Food-Induced Hypotension in Patients with Autonomic Dysfunction 351
C. J. Mathias, D. F. da Costa, P. Fosbraey, C. McIntosh, and R. Bannister

Local Regulation

Oxygen and Control of Neurohypophyseal Blood Flow 357
D. F. Hanley, D. A. Wilson, and R. J. Traystman

Oxygen Radicals in the Microcirculation 365
H. A. Kontos

Electrophysiological Effects of Hypoxia on Vascular Smooth Muscle 371
G. Siegel, J. Grote, K. Zimmer, A. Adler, and B. Litza

Role of Inorganic Phosphate in Functional Hyperemia in Skeletal Muscle 377
O. Hudlicka, and F. El-Khelly

Role of Adenosine in Exercise Vasodilatation 383
F. Karim, H. J. Ballard, and D. Cotterrell

Hypoxia and the Pulmonary Circulation 389
N. F. Voelkel, C. O. Feddersen, S. W. Chang, and T. McDonnel

Autoregulation in Skeletal Muscle 395
B. F. Robinson, and N. Benjamin

Endothelium–Dependent Responses

Studies on Relaxation of Rabbit Aorta by Sodium Nitrite: The Basis for the Proposal that the Acid-Activatable Inhibitory Factor from Bovine Retractor Penis is Inorganic Nitrite and the Endothelium-Derived Relaxing Factor is Nitric Oxide 401
R. F. Furchgott

Source: https://www.industrydocuments.ucsf.edu/docs/gkmv0000

Prostacyclin and Endothelium-Derived Relaxing Factor from Cultured Endothelial Cells 415
S. Moncada, R. M. J. Palmer, and R. J. Gryglewski

Evidence for the Release of a Vascular Relaxing Factor from Cultured Human Endothelial Cells 421
W. E. Glover, R. M. Marks, and G. G. Petrenas

Biochemical and Pharmacological Properties of Endothelium-Derived Relaxing Factor and Its Similarity to Nitric Oxide Radical 427
L. J. Ignarro, R. E. Byrns, and K. S. Wood

Influence of Endothelium and Cyclic GMP on Alpha-Adrenoceptors 437
T. Godfraind, and I. Alosachie

Blockade of Endothelium-Derived Relaxing Factor and Inhibitory Factor by Hemoglobin 443
W. Martin, J. A. Smith, A. H. Henderson, and R. F. Furchgott

Inhibition of Endothelial Lysolecithin Acyltransferase Stimulates the Formation of Endothelium-Derived Relaxing Factor 447
R. Busse, and U. Forsterman

Extracellular Calcium Is Not Required for Melittin-Induced Release of Endothelium-Derived Relaxing Factor From Intact Tissues or Cultured Endothelial Cells 453
A. L. Loeb, R. A. Johns, and M. J. Peach

Excitatory and Inhibitory Factors Released from the Endothelium by Eicosanoids 463
G. J. Dusting, and P. S. Macdonald

Endothelium-Dependent Responses to Histamine 469
I. Leusen, and J. Van de Voorde

Calcitonin Gene-Related Peptide—Vasodilator Responses in the Human Vasculature 475
M. Schachter, S. Thom, A. Hughes, G. Martin, P. Goldberg, and P. Sever

Heterogeneity of the Vascular Effects of Bradykinin 479
H. Tsuru

Endothelial Cells as Oxygen Sensors 483
U. Pohl, R. Busse, and E. Bassenge

Polarized Release of Endothelium-Derived Relaxing Factor(s) by Melittin in Canine Femoral Arteries 489
G. M. Rubanyi, and P. M. Vanhoutte

Endothelium-Derived Relaxing Factors and Cyclic GMP in the Microcirculation 497
G. Kaley, E. J. Messina, and M. S. Wolin

Endothelium-Dependent Relaxation and the Reticuloendothelial System 503
B. M. Altura

Endothelium-Dependent Relaxations Are Inhibited in Atherosclerotic Blood Vessels 511
T. J. Verbeuren, and A. G. Herman

Source: https://www.industrydocuments.ucsf.edu/docs/qkmv0000

Atherosclerosis Alters Endothelium-Dependent Responses to a Variety of Neurohumoral Agents: Potential Mechanisms and Pathophysiological Consequences 517
D. G. Harrison

Hypertension and Endothelium–Dependent Responses 523
T. F. Lücher, and P. M. Vanhoutte

Heterogenous Responses to Histamine in Blood Vessels 531
N. Toda

Endothelium and Responses of Large Coronary Arteries to Serotonin *In Vivo* 537
W. P. Dole, K. G. Lamping, and M. L. Marcus

Endothelial Dysfunction May Lead to Coronary Vasoconstriction in Patients with Coronary Atherosclerosis 543
P. Ganz, P. L. Ludmer, J. A. Leopold, T. L. Shook, R. R. Wayne, G. H. Mudge, R. W. Alexander, and A. P. Selwyn

Subject Index 551
